EDUCATION

Full Stack Immersion

CareerFoundry 2020-2021

- Eight-month intensive project-based web development/software engineering program.
- Curriculum focus on JavaScript, HTML & CSS, MERN & MEAN tech stacks, React-Native, and Serverless, Progressive Web Applications.

Juris Doctorate

Suffolk Law School 2000-2003

FREELANCE & OTHER PROJECTS

Snacks Pizza E-Commerce 2021 -2022

- E-Commerce application developed with Next.js, React, Redux, and MongoDB that uses PayPal API for customer card payments.
- Incorporated Admin dashboard for products/orders management and Order Tracking page for customers.
- Customized for direct-sales nutrition reps who previously advanced customer order costs for cash on delivery payment.

MyFlix (React & Angular versions) 2020 - 2021

- Single page MERN stack application gives users the ability to interact with a display of movies, add/delete movies from list of favorites, and update/delete profile accounts.
- Rebuilt client with Angular and Angular Material.
- Utilized HTTP and JWT-based authentication.
- Tested API endpoints during development with Postman.

JibJab Mobile Chat 2021

- Android and iOS mobile application allows users to share messages, images, and location data.
- Developed with React Native, Expo CLI, and Gifted Chat library.
- Integrated Firebase Authentication, Database and Cloud Storage.

Heroes & Villains 2021

- JavaScript client with Node/Express server loads 500+ hero & villain characters from MongoDB.
- Users provided with six detailed character data categories in modals and sub-modals with various CSS animations/transitions.

Tech Connect 2020-2021

- Serverless, progressive React web application (PWA) built with test-driven development (TDD) technique.
- Employed AWS Lambda to host serverless functions and Google Calendar API to fetch user's upcoming events.
